Professional Summary

Front-End Developer with solid hands-on experience in Angular and TypeScript. Passionate about building responsive and user-centric web applications. Completed advanced training and built multiple scalable projects involving API integration, Git workflows, and component-based architecture. Eager to contribute clean, maintainable code and collaborate within modern development teams.

Technical Skills

- Languages & Frameworks: HTML, CSS, SCSS, JavaScript, TypeScript, Angular, jQuery
- Tools & Technologies: Git, GitHub, npm, Node.js
- Other Skills: API integration, Responsive Design, Bootstrap

Projects & Experience

Freelance / Personal Projects

- Admin Dashboard (Angular): Developed a fully responsive dashboard using Angular & SCSS, including user management, authentication, and charting features.
- News Reader App: Integrated real-time API for fetching categorized news with search and pagination using Angular services and RxJS.

Over 1 year of continuous experience in front-end development, applying real-world skills through complete project cycles from design to deployment.
